It is a well-known fact that in sowing one
bushel of clover seed to six acres that an average
of 66 clover seeds are sown to every square foot of
ground. In broadcasting the wind and rain carry the
seed in patches. Some portions have so much
seed on that it cannot grow; other parts have no
seed at all. Drill your seed with theBuckeye Special Alfalfa
and Grass Seed DrillGet all the seed in the ground and save half
the seed. In selling you this machine we are of-
fering the farmers of Mason county the best prop-
osition ever made in the way of machinery. With
half the seed we guarantee you a better stand.
They have been carefully tested for three seasons
now and have proven thoroughly satisfactory in
every way. Come in, let us show the machine to

LEE WILSON IN A SHIPWRECK

(Dover News)

No doubt you have read in the daily
press how a vessel went on the rocks on
the Florida coast one night last week,
and how assistance was called by wire-
less and how the passengers were all
saved by the timely arrival of assist-
ance. Lee Wilson, son of D. P. Wilson,
of Dover, was a passenger on that ves-
sel. A letter received from Lee Tues-
day tells how the vessel went aground
in a storm about four o'clock in the
morning. Wireless calls were sent out
and a vessel came to their assistance
late in the afternoon and took the pas-
sengers off in lifeboats. He says the
sea was so rough it took the lifeboats
several hours to make the trip from the
stranded boat to the rescuing vessel.
But that was one little incident of
Lee's trip to Cuba that was not
down on the program, and one he does
not care to repeat.

repair the old flags now kept at West
Point, N. Y., and an expert needle-
